Dear Human Resources Representative,

For the last 2 summers I have been an Instructor at iD Tech camps, first as an Instructor and then more recently as a Lead Instructor. Teaching computer science to both teens and young children has given me a unique perspective as a programmer. It has helped me to think in different ways about the code I create in a way that has helped to improve my coding ability. Furthermore, the large amount of experience I've gained working in a team is something I know I can use to bring together the projects I'd work on at your company.

As someone who has been programming for six years both recreationally and, more recently, professionally, I am always looking for ways I can both learn and make an impact. As an intern at your company I am sure I will have many opportunities to both learn and impact not just on the customers your products are made for but also on the team I would work with.

I look forward to further correspondence with you, I can be best contacted by email at jfromentrudder@gmail.com however, I can also be reached on my cell phone at 917-889-4666. Thank you for your time and consideration and I look forward to hearing from you.

Sincerely,

Jayantra Froment Rudder
